

Financial Analysis: A Critical Approach (for Non-Finance Managers)

By Wong Kah Teck, CFA, MBA (Chicago Booth), BSc (Wharton School) and BA (University of Pennsylvania)

Program Overview

“How do we effectively communicate our company’s financial performance to investors and other stakeholders? As a non-finance professional, how do I decipher financial statements?”

“What are financial ratios? Why do they tell us? What explains differences in financial ratios across firms?”

“How can financial analysis be applied to make better investment decisions?”

“How do we assess the reliability of a company’s reported financials?”

“Is launching a new product viable financially?”

The **“Financial Analysis: A Critical Approach”** Program equips participants with useful frameworks to address the above issues and more. In this Program, we take a *critical* look at financial statements, financial ratios, pro-forma financials and evaluation of corporate investments. **This Program emphasizes application and critical thinking over theory and is ideal for non-finance managers.** Business school cases based on real world companies and spreadsheet simulations will form the core of the learning experience. This gives participants opportunities to critically assess a company’s financial performance, effectively communicate it, and make decisions using financial analysis tools.

Benefits:

- Learn using real world cases prepared by premier business schools and spreadsheet simulations (emphasize application over theory)
- Equip yourself with financial terms and frameworks to effectively communicate a company’s financial performance to investors and other stakeholders
- Integrate Financial Analysis with other business areas such strategy and marketing
- Recognize the limitations of financial analysis and suggest how to overcome these limitations
- Gain frameworks to evaluate financial viability of corporate initiatives such as new product introductions

Key Program Takeaways

- Describe the scope and importance of financial analysis
- Analyse a firm’s financial statements by focusing on “Must Know” financial statement metrics
- Assess a firm’s financial performance over time compared to other firms using financial ratios
- Explain differences in the presentation of financial statements and ratios across industries
- Make an investment decision using a holistic financial analysis framework
- Infer a firm’s financial performance using pro-forma financial statements
- Judge the reliability of reported financial statements
- Evaluate a corporate investment using breakeven and capital budgeting analysis

How Will You Learn

- Business School Cases
- Spreadsheet simulations
- Interactive lectures

Session 7: Evaluating Corporate Investments

- Importance of evaluating corporate investments
- Corporate investment evaluation frameworks- Net Present Value and the Internal Rate of Return
- Limitations of corporate investment evaluation frameworks

Case: Should a new product be introduced?

Session 8: Breakeven Analysis

- Distinction between fixed and variable costs
- The concept of “true” breakeven
- Course wrap-up and conclusion

Case: Will a new product achieve breakeven?

Trainer's Profile

Kah Teck has more than a decade of capital markets experience. He was a portfolio strategist in CIMB Investment Bank and Am Investment Bank where he was responsible for spearheading investment advisory and product development initiatives and also played an active role in evaluating numerous plain vanilla and hybrid fund raising options. He has also worked for the Securities Commission in research and formulating capital market development policies.

Now the Managing Director and Principal Trainer for FMTCS Sdn Bhd, Kah Teck passionately shares his knowledge and experience with professionals in many of Malaysia's leading financial institutions and government-linked institutions. His trainees frequently credit him with the ability to make finance interesting and demystify complex finance concepts.

Kah Teck graduated *summa cum laude* with a dual degree in finance and economics from the University of Pennsylvania's Wharton School and School of Arts and Sciences, and holds an MBA (with Honors) from the Booth School of Business, University of Chicago. He is also a Chartered Financial Analyst (CFA) charterholder. Kah Teck was also awarded the prestigious ASEAN scholarship to pursue pre-university studies in Singapore.

His teaching and research interests are in corporate finance, derivatives, securities valuation, financial risk management, financial modelling and financial analysis.

What our past participants say about Kah Teck's training delivery:

- Kah Teck is very enthusiastic and knowledgeable and able to **facilitate lively interaction** among participants. Great job!
- Use of **case studies involving actual companies** and **computer simulations** make the topic come alive and also show how financial analysis can be used to make decisions. Keep it up!
- As a non-finance professional, I now have better grasp of financial terms and the numbers that matter, allowing me to **communicate more effectively** with my colleagues in the finance department
- Finally, a financial analysis course that **focuses on practical analysis and critical thinking** rather than theory and accounting standards
